

MCT-180 Film/Coating thickness Gauge

Overview:

MCT-180 is a reliable device for measuring the thickness non-metallic coating layer on the metallic pieces.

The device is suitable for the industrial and the user friendly operation of the gauge makes it a fine tool for anybody.

The wire connected probe makes it possible to reach tight spots.

Features:

- High-sensitivity sensor for precise measurement
- Zero point, two point and basic, three different calibration
- Data store/ Data recall/ Data delete function
- Beep sound indication
- LCD backlight display
- Low battery indication
- Auto power off

Parameter	Values
Measuring range	0-1800μm
Accuracy	± (3%H±1μm)
Resolution	0.1μm (<100μm) or 1μm(>100μm)
Measuring mode	Single, Continually and Difference
Measure in	Metric/Imperial
Data Analysis	Average, Maximum, Minimum, Standard deviation and measuring times
Power supply	9V battery
Weight	220g (without battery)
Dimensions	70*145*28mm
