

Proudct name : Digital Infrared Thermometer BE300

Mode : BE300

Infrared Temperature Meter measures the infrared energy of the object to determine the temperature of the object measured, which features non-contact, quick response, no impact on themperature attribution on the measured. This IR Thermometer with good precision is designed to quickly & accurately measure temperature of object's surface from -50~380°C or -58~716°F with Laser guide. It safely measure the surface temperature of hot, hazardous, reflective, shiny, hard-to-objects with ease.
