

**GAZELLE G9304 1000V Insulation Tester**

The Gazelle G9304 Insulation Tester can be used for both troubleshooting and preventive maintenance activities. Tested for safe use in CATIII 600V environment and has a selectable step voltage of 250V, 500V and 1000V. Features auto calculation of PI and DAR measurement. So whether you work on cables, motors or switch gears, the G9304 Insulation Tester is ideally suited to help you with your tasks to improve QEPS (Quality, Efficiency, Productivity, Safety).

- Insulation Resistance with additional Feature for AC Voltage and Low resistance measurement.
- With a 3-selections of voltage testing from 250V, 500V and 1000V
- PI and DAR test measurement.
- CAT III 600V safety rating with double insulation
- One press start and stop button with light indicator during testing.
- Include GAZELLE branded carrying case
- Covered by One-year Gazelle warranty repair by replacement!

Specifications	Range	Best Accuracy
Insulation Resistance (Ω)	Test Voltage - 250V/500V/1000V	0%~10%
	250V - 0.00MΩ~5.5GΩ	±(3%+5)
	500V - 0.00MΩ~5.5GΩ	±(3%+5)
	1000V - 0.00MΩ~5.5GΩ	±(3%+5)
Low Resistance (Ω)	0.01Ω~200Ω (about 5.0V/>200mA)	±(2%+3)
AC Voltage (V)	30V~600V	±(2%+3)
<b>Features</b>		
DAR	60s/15s and 60s/30s	
PI	√	
LCD Backlight	√	
Alarm Light Display	√	
Auto Discharge	√	
Test Voltage Vice Display	√	
Power	1.5V Batteries AA × 6	

**Standard Accessories**

- Operating Manual
- Test Leads - 3pcs
- Carrying Bag
- 1.5V AA - 6pcs
