

MAN-740 Hot wire Anemometer

Overview:

MAN-740 is a hot wire anemometer with the capability of measuring the velocity, temperature of the air and CMM as well. High precision, the reliability and user friendly operation of the device makes it a perfect choice for the industrial and urban users.

Innovative pocket sized anemometer has one of the fastest response times of its class and the bar graph on top the monitor makes it easy to read the amount.

Features:

- Average/Current Reading
- Data Hold
- Max/Min Reading
- Backlight Display
- Low Battery Indication
- Manual/Auto Power Off
- The devices has various colors

Parameter	Values
Air temperature range	0~45° C, 32~113° F
Accuracy (temp)	± 2° C
Air velocity	0~30m/s
CMM	0~999900 m ³ /min
Resolution (temp)	0.1° C, 0.001m/s
Resolution (velocity)	0.001m/s
Power supply	6F22 9V
Dimensions	67.5*45.8*30.2mm
