

Nvis 901 is an advanced microprocessor based pH meter. Nvis 901 is designed for scientific laboratories and Universities. It has three point calibration, Auto temperature compensation, PC Interface, etc. Nvis 901 is a precise measuring instrument which provides resolution of 0.01 for pH and 0.1°C for temperature. PC communication software provides facility to store pH and temperature data on computer & graphs can be plotted for pH vs Time, and Temperature vs Time.

## Features

- ▶ pH range 0-14
- ▶ Temperature range 0-80°C
- ▶ Three point calibration
- ▶ PC Interface
- ▶ Auto Temperature Compensation
- ▶ Manual Temperature Compensation
- ▶ 2 Year Warranty

## Technical Specifications

pH Range	: 0-14
Temperature Range	: 0-80°C
pH Resolution	: 0.01pH
Temperature Resolution	: 0.1°C
PC Interface	: RS232 and USB
Mains Supply	: 230V $\pm$ 10%, 50Hz
Dimension(mm)	: W 199 x D 285 x H 90

Graph between pH vs Time and Temperature vs Time

Designed & Manufactured by :  
**Nvis Technologies Pvt. Ltd.**
