

SCOUT TK THERMAL MONOCULAR

The **FLIR Scout TK** is a pocket-sized thermal vision monocular for exploring the outdoors—at night and in lowlight conditions. Scout TK reveals your surroundings and helps you see people, objects and animals over 100 yards (90 m) away. There are several video color palettes to enhance viewing and can even record video and still images to share with others.

The Scout TK starts up in seconds and features a rechargeable internal Li-ion battery last for 5 hours. The easy to use buttons control the power, color palettes, E-zoom & screen brightness. This weather-resistant pocket sized thermal imager is ideal for all your outdoor needs.

Use for personal, home security at night by keeping an eye on your property, search for missing pets, or scan sidewalks, parking lots & parks in the dark. Simple to use, Scout TK is the perfect companion, whether in the back country or your own backyard.
