

Replacement Test Leads

Safety Information

Warning

To avoid possible fire, electric shock, or personal injury:

- Read all of the safety information in the test set Users Guide before you use the product.
- Do not use test leads if they are damaged. Examine the test leads for exposed metal and damage to the insulation. Make sure the wear indicator on the cords does not show. The wear indicator is the white layer below the outer, braided layer. Verify the continuity of the test leads.
- Do not exceed the Measurement Category (CAT) rating of the lowest-rated individual component of a product, probe, or accessory.
- Keep your fingers behind the finger guards on the probes.
